

## Proposed Assignment of Non-Participating Jurisdiction Carriers to a Base State

Effective with the 2012 registration year, carriers with a principal place of business in a non-participating jurisdiction shall be assigned to a base state as follows:

1. Carriers with a place of business in one or more participating jurisdictions may choose any participating jurisdiction in which they maintain a place of business as their base state.
2. Carriers that do not maintain a place of business in any participating jurisdiction shall be assigned a base state from among the participating jurisdictions.
3. Participating jurisdictions may volunteer to be responsible for all or a portion of carriers in a non-participating jurisdiction. In the event that more than one participating jurisdiction volunteers for a non-participating jurisdiction, that non-participating jurisdiction's carriers shall be apportioned among the volunteering participating jurisdictions as equitably as possible using a method that will insure that carriers will be apportioned to the same state for subsequent registration years.
