Re: Missouri's Participation in the UCR Program

Missouri is happy to report to the UCR Board that our legislation to participate in the UCR Agreement was enacted by the General Assembly and signed by our governor, and becomes effective August 28, 2008. At that time, Motor Carrier Services will begin to fully participate in the UCR program and will begin registering its base state carriers.

As part of our implementation, Missouri will work toward ensuring that all of its registrants are registered properly under the UCR Act. In doing so, any monies collected by Missouri for the year 2007 will be turned over to the depository to help fulfill the entitlements of participating states under the UCR Act. Any monies collected by Missouri in 2008 or collected through the national online system after August 27, 2008 will be part of Missouri's 2008 entitlement amount, as previously reported to the board, and this amount will be retained by Missouri. Any monies collected over Missouri's entitlement amount during 2008 will be turned over to the depository to help fulfill other participating states' entitlements. Missouri will be ready to mail out the 2009 renewals and register our carriers through a state-developed system. Our agency will also be ready to upload data to the Federal Motor Carrier Safety Administration using a third party vendor.

Our agency is excited about finally being able to participate in this program on behalf of our industry.

Sincerely,

Jay Skouby
Motor Carrier Services Director
