Please Correct following Error(s): The card type you've selected credit or debit card is incorrect please click the Previous button in the lower left hand corner and choose the oppostive card type .	
<b>Add above Name and Title (Do not use punctuation)</b>	
<b>Depository System issues</b>	
1) Remove the draft invoice and make it an actual invoice, add invoice generated date no matter who generates it.	
2) Need a report or some excel on the depository distribution screen for the admin to generate it.	
3) Report of all the money admin has after distribution (ex: all the states are overcap). (Need discussion)	
4) Make month open after 10 <sup>th</sup> or after sandy closes the book (Need discussion)	
1) How do the admin wants to add an invoice number for the already available data in production. (For old data no need of any invoice number and date)	
2) Update the distribution and amount received data.	
1) Extra money after distribution should be gone to administrative funds. Administrative funds cap is 5 million for the current years we have in system. (We need to make it configurable).	
2) If the money is over administrative funds then it has to go next year undercap states revenue during the distribution. An idea put forward but scott will further communicate on it.	
3) New report when a state has acknowledged the money sent from depository distribution month by month report.	
4) Revenue reported by state as a report.	
Add a unique invoice number to each invoice	02/01/2016
the current system date to each invoice when it is generated	02/01/2016
Change the due date on each invoice to 30 days after the date it is generated	02/01/2016
change the system to allow me to generate an invoice for a state as soon as they have acknowledged	02/01/2016
change the system to allow me to distribute funds	02/01/2016
generate a report by state that shows the amount and date of all funds acknowledged for a specific UCR registration year. Need to be able to pull a breakdown of individual acknowledgements	02/01/2016
